Python, MATLAB, C++/JUCE, Max/MSP, Pure Data

EDUCATION

M.S. Music & Acoustic Engineering

Politecnico di Milano
2025 – Present

B.A. Sound Technology

Azad University — Tehran, Iran
2018 – 2024

LANGUAGES

English — fluent, C1

Persian — native

Italian — A2

Arabic — basic

PROFILE

Audio engineer and music technologist with 6+ years of experience and a graduate-level background in DSP. Comfortable taking a project from a simple idea to a finished, ready-to-release mix.

Mix & Master

Multi-genre studio mixing and mastering for streaming.

Design & Score

Sound design, audio logos, scoring for film, animation & games.

Repair & Podcast

Dialogue cleanup, de-noising, de-essing, episodic editing.

EXPERIENCE

Mixing & Recording Engineer

2018 – 2024

Studio Bell — Tehran, Iran

- Recorded, mixed, and produced audio across multiple genres at one of Iran's most established recording studios
- Worked extensively with analog/digital mixers, synthesizers, and outboard gear across full production pipelines

Independent Composer & Producer

Ongoing

Self-directed — Milan / remote

- Composed and produced original scores and experimental works for short film and standalone release
- Released original tracks as an independent artist, composed and produced music for other artists, and plays multiple instruments — familiar with all types of synthesizers

Creative Director

2020 – 2022

Iranian Wire and Mesh

- Directed creative strategy for a new product launch, overseeing brand identity, advertising campaign, catalog and photography, and market research

PROFESSIONAL PROJECTS

Spatially Augmented Conducting Simulator

2026

Politecnico di Milano

- Real-time conducting simulation via hand-gesture tracking; physically-modeled bowed-string synth and custom hall reverb, synced via OSC

Quattro Formaggi — Interactive Browser Instrument

2026

Politecnico di Milano

- Browser-based instrument performing a virtual string quartet via keyboard, MIDI, and an interactive control surface

BREATHE — Real-Time Audio Enhancement Plugin

2024

Bachelor final project — Max for Live device

- One-stop real-time repair plugin for poorly recorded live audio: denoise, spectral energy normalizer, four-band compressor, stereo-widening overdrive
